TO: ALL COMMERCIAL LINES AGENTS

## COMMERCIAL LINES CLASS APPETITE UPDATE EFFECTIVE IMMEDIATELY

MBG's commercial lines underwriting team is reviewing the acceptability rating for classes of business. A revised appetite guide will be forthcoming later in the year. In the meantime, as we find classes that need to be changed directly, we will send individual notices such as this.

Effective immediately, Mutual Benefit Group (MBG) is changing the acceptability rating information for the following classifications:

**Heaters – Installation or Repair – (Boiler Work – 15 PSI or Less for Commercial; No industrial work)**  
**Heating Systems Installation or Repair – (Boiler Work – 15 PSI or Less, No industrial work)**

The above classes are acceptable except the acceptability rating is changed to "P" Prohibited for all AC/BOP and Products/Completed Operations with any **fireplace installation or service work**.

MBG's Commercial Lines Insurance Rating (CLIR) system as well as CLASS Appetite Guide are being updated to reflect this change. Please note that if you have any policies in force under this classification, your underwriter will contact you regarding the renewal plan.

Mutual Benefit is committed to providing a stable, competitive, long-term market for your Commercial Lines business. Any questions regarding this change should be directed to your commercial lines underwriting team or marketing representative.
